ABSTRACT

A mart is an interactive website that provide an opportunity to users to buy electronics, electrical and hardware items. It delivers a constructive service to each and every person in India, to furnish their needs in terms of buying online and buying at affordable prices. This way of executing trade activities may be useful for organizations that serve customers who are distributed all over the India.

The internet acts as an affordable link between customers and organizations whose goods and services they need. This lowers the costs incurred by customers and businesses in actualizing business transactions. With one well connected store, such organizations are in a position to serve large no of customers.
